AEROSPACE MEDICINE AND BIOLOGY

1992 CUMULATIVE INDEX

INTRODUCTION

WHAT THIS CUMULATIVE INDEX IS

This publication is a cumulative index to the abstracts contained in NASA SP-7011(359) through NASA SP-7011(370) of *Aerospace Medicine and Biology: A Continuing Bibliography*, NASA SP-7011, and by means of supplements, serves as a current abstracting and announcement journal for references on bioscience and biotechnology. It has been compiled through the cooperative efforts of the American Institute of Aeronautics and Astronuatics (AIAA), and the National Aeronautics and Space Administration (NASA). Entries prepared by the two contributing organizations are identified as follows:

- 1. NASA entries by their STAR accession numbers (N92-10000).
- 2. AIAA entries by their IAA accession numbers (A92-10000 series).

HOW THIS CUMULATIVE INDEX IS ORGANIZED

This Cumulative Index includes a subject, personal author, corporate source, foreign technology, contract number, report number, and accession number index.

HOW TO USE THE SUBJECT INDEX

Two types of cross-references appear in the subject index:

1. Use (U) references indicate that the subject term is not "postable," i.e., not a valid term, and that the following term or terms are used instead. For example:

DOSE

U DOSAGE

AIRLINERS

- U COMMERCIAL AIRCRAFT
- U PASSENGER AIRCRAFT
- 2. Narrower Term (NT) references refer the user to more specific headings in the same subject area, under which additional material on the subject may be found. For example:

FATIGUE (BIOLOGY)

NT AUDITORY FATIGUE

NT FLIGHT FATIGUE

NT MUSCULAR FATIGUE

In addition, a searcher may use the title or title and title extension in the index to narrow further his quest for particular items; this is because subject terms may include documents on different aspects of the same subject term. For example:

BIOLOGICAL EFFECT

Vibratory force effect upon biological systems, particularly human organism.

Biological effect of cosmic and solar radiations on human body at high altitudes.

HOW TO USE THE PERSONAL AUTHOR INDEX

All personal authors used in the abstract-section citations in the individual Supplements appear in the index. Differences in translation schemes may require multiple searching on the index for variants of an author's name. For example:

EMELIANOV, M. D.

and

YEMELYANOV, M. D.

HOW TO USE THE CORPORATE SOURCE INDEX

The corporate source index entries are abridged versions of the corporate sources used in the abstract-section citations in the individual Supplements. The corporate source supplementary (organizational component) does not appear in the index. For example:

BOEING CO., SEATTLE, WASH. MILITARY AIRCRAFT SYSTEMS DIV. (Source citation entry) BOEING CO., SEATTLE, WASH. (Source index entry)

HOW TO USE THE FOREIGN TECHNOLOGY INDEX

The foreign technology index identifies research performed outside of the United States. Listings in this index are arranged alphabetically by country of intellectual origin. For example:

CHINA, PEOPLE'S REPUBLIC OF

HOW TO USE THE CONTRACT NUMBER INDEX

All contract numbers that are identified in the abstract-section citations in the individual Supplements appear in this index. Changes by agencies in the style in which contract numbers are presented may require multiple searching for variants. For example:

AF 33(615)-71-C-1758 F33615-71-C-1758

HOW TO USE THE REPORT NUMBER INDEX

All report numbers that have been assigned by the corporate source, monitoring agency or cataloging activity appear in this index. Variations in cataloging may result in different report number series. For example:

TP-924 ONERA-TP-924

HOW TO USE THE ACCESSION NUMBER INDEX

All documents that were acquired, indexed, and announced in *STAR* during the year which have been assigned a unique identification number appear in this index. For example:

N92-10001 N92-10002

IDENTIFICATION OF DESIRED SUPPLEMENT

The abstract and descriptive cataloging for any accession number selected from the indexes may be found in the appropriate Supplement. The page-number range of each Supplement appears on the inside front cover of this index. Once the range of page numbers containing the selected accession number is located in the second column, the desired supplement number will be found in the first column. For example:

Page 248 will be found in Supplement 365

AVAILABILITY OF DOCUMENTS

Information concerning the availability of documents announced in *Aerospace Medicine & Biology* is found in the Introduction to the most currently issued *Supplement*.

FEDERAL DEPOSITORY LIBRARY PROGRAM

In order to provide the general public with greater access to U.S. Government publications, Congress established the Federal Depository Library Program under the Government Printing Office (GPO), with 53 regional depositories responsible for permanent retention of material, inter-library loan, and reference services. At least one copy of nearly every NASA and NASA-sponsored publication, either in printed or microfiche format, is received and retained by the 53 regional depositories. A list of the regional GPO libraries, arranged alphabetically by state, appears on the inside back cover. These libraries are *not* sales outlets. A local library can contact a Regional Depository to help locate specific reports, or direct contact may be made by an individual.

PUBLIC COLLECTIONS OF NASA DOCUMENTS

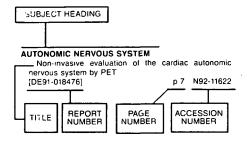

An extensive collection of NASA and NASA-sponsored publications is maintained by the British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England for public access. The British Library Lending Division also has available many of the non-NASA publications cited in *STAR*. European requesters may purchase facsimile copy or microfiche of NASA and NASA-sponsored documents, those identified by both the symbols # and * from ESA — Information Retrieval Service European Space Agency, 8-10 rue Mario-Nikis, 75738 CEDEX 15, France.

TABLE OF CONTENTS

Subject Index	Page A-1
Personal Author Index	
Corporate Source Index	C-1
Foreign Technology Index	D-1
Contract Number Index	E-1
Report Number Index	F-1
Accession Number Index	G-1

SUBJECT

Typical Subject Index Listing

The subject heading is a key to the subject content of the document. The title is used to provide a description of the subject matter. When the title is insufficiently descriptive of document content, a title extension is added, separated from the title by three hyphens. The accession number and the page number are included in each entry to assist the user in locating the abstract in the abstract section. If applicable, a report number is also included as an aid in identifying the document. Under any one subject heading, the accession numbers are arranged in sequence.

ABDOMEN

Dynamic response of thorax and abdomen to p 301 A92-43021

ABIOGENESIS

The origin and amplification of bimolecular chirality p 30 A92-16361

Endogenous production, exogenous delivery and impact-shock synthesis of organic molecules - An inventory for the origins of life p 90 A92-20044

Hydrogen cyanide polymerization cosmochemical pathway --- for abiogenesis

p 152 A92-21019 New insights on the comma-less theory --- of chemical

p 296 A92-44655 evolution Chemical studies on the existence of extraterrestrial life p 372 A92-46445

Abiotic synthesis of amino acids and nucleic acid bases simulating an action of cosmic radiation

p 413 A92-53743

ABLATIVE MATERIALS

Eye/sensor protection against laser irradiation ablative mirror devices: A materials assessment

p 408 N92-30615 [AD-A2487871

ABNORMALITIES

The effect of various types of abnormalities of the cupuloendolymphatic system of the vestibular apparatus on the system's dynamic characteristics

p 155 A92-25259

ABSORBENTS

Comparison of metal oxide absorbents for regenerative carbon dioxide and water vapor removal for advanced ortable life support systems

[SAE PAPER 911344] p 199 A92-31302 Mathematical modelling of a four-bed molecular sieve with CO2 and H2O collection

[SAE PAPER 911470] p 207 A92-31374

Optimization studies on a 99 percent purity molecular sieve oxygen concentrator - Effects of the carbon to zeolite p 243 A92-35446 A 99 percent purity molecular sieve oxygen generator

p 249 N92-22483 Metal oxide absorbents for regenerative carbon dioxide

and water vapor removal for advanced portable life support p 322 N92-27021 systems

ABSORBERS (MATERIALS)

A 99 percent purity molecular sieve oxygen generator p 249 N92-22483

Sound attenuation characteristics of the DH-133A helmet p 324 N92-27991

[AD-A248351]

ABSORPTION

Noninvasive determination of respiratory ozone absorption: Development of a fast-responding ozone analyzer

(PB91-243220) p 173 N92-19952

ABSTRACTS

Program and abstracts of the 2nd Meeting of the Society for Research on Biological Rhythms p 4 N92-10280

[AD-A2400071 JPRS report: Science and technology. USSR: Life

[JPRS-ULS-91-0191

JPRS report: Science and technology. USSR: Life

p 72 N92-14577

p 72 N92-14580 [JPRS-ULS-91-022] JPRS report: Science and technology. USSR: Life

Professional pilots' evaluation of the extent, causes, and means of reduction of alcohol use in aviation p 348 A92-45009 Professional pilots' evaluation of the extent, causes, and p 434 A92-54732 reduction of alcohol use in aviation **ALERTNESS** Alertness management in flight operations - Strategic napping (SAE PAPER 912138) p 273 A92-39978 Lapses in alertness: Brain-evoked responses to task-irrelevant auditory probes [AD-A247669] p 356 N92-28940 Light as a chronobiologic long-duration space operations countermeasure for [NASA-TM-103874] p 395 N92-31167 Empirical development of a scale for the prediction of performance on a sustained monitoring task AD-A2524431 D 409 N92-31294 ALGAE Evolution of bioconvective patterns in variable gravity p 1 A92-13242 Theory and experimental results on gravitational effects p 93 A92-20831 on monocellular algae Design and operation of an algal photobioreactor p 134 A92-20994 system Hydrostatic factors affect the gravity responses of algae and roots p 259 A92-39146 Megascopic eukaryotic from algae the 2.1-billion-year-old Negaunee Iron-Formation, Michigan p 375 A92-49507 Thioredoxin and evolution p 59 N92-13629 Sedimentary organic molecules: Origins and information p 60 N92-13634 Production potential of biochemicals from algae and other biotechnological innovations enabled by higher solar concentration p 71 N92-14478 on microgravity the plasma membrane-cytoskeleton interactions during cell division in Chlamydomonas p 222 N92-23069 **ALGORITHMS** A method and algorithm for the simulation of a decision-making process by an operator in connection with p 241 A92-33680 the monitoring of complex systems Algorithm for detection of VFIB in real time from ECG p 5 N92-10542 Three dimensional reconstruction of vascular networks in trinocular vision [TELECOM-PARIS-90-E-022] p 37 N92-12406 The matching of doubly ambiguous stereograms [AD-A241251] p 83 N92-14587 Attention, automaticity and priority learning [AD-A242226] N92-17458 p 127 Visually Coupled Systems (VCS): The Virtual Panoramic Display (VPD) System p 248 N92-22344 Computation of incompressible viscous flows through artificial heart devices with moving boundaries p 233 N92-22464 Electromagnetic imaging of dynamic brain activity p 274 N92-24672 [DE92-005017] Night vision goggle simulation (AD-A2457451 p 292 N92-26158 Investigation of dynamic algorithms for pattern recognition identified in cerebral cortex [AD-A247860] p 309 N92-27512 **ALKALI VAPOR LAMPS** Soybean stem growth under high-pressure sodium with supplemental blue lighting p 254 A92-38102 p 254 A92-38102 ALPHANUMERIC CHARACTERS Development of automatic processing with alphanumeric p 21 A92-11188 materials Ordinal judgments of numerical symbols by macaques p 415 A92-54276 (Macaca mulatta) Display format, highlight validity, and highlight method: Their effects on search performance [NASA-TM-104742] p 25 N92-10287 ALTITUDE Improving survival after tissue vaporization (Ebullism) N92-22353 ALTITUDE ACCUMATIZATION Internal carotid flow velocity with exercise before and after acclimatization to 4,300 m p 3 A92-10355 Brain tissue pH and ventilatory acclimatization to high altitude p 118 A92-22843 The characteristics of structural changes in membranes

of the rectum of animals in the process of adaptation to high altitude p 159 A92-27635 Correlation between anaerobic threshold test and cardiovascular compensation in hypoxia

p 301 A92-43020 Muscle accounts for glucose disposal but not blood lactate appearance during exercise after acclimatization to 4,300 m p 304 A92-44636 p 424 A92-55068 Mountain sickness ALTITUDE CONTROL

An informal analysis of flight control tasks

p 195 N92-21474

Sensitivity to edge and flow rate in the control of speed and altitude p 195 N92-21475

ALTITUDE SICKNESS

Altitude decompression sickness - A review

p 3 A92-11250 Acupuncture treatment of aerotitis media in aviators p 35 A92-16404

Adaptation of the organism to stress and to high-altitude hypoxia leads to the accumulation of different hsp 70 p 69 A92-18312 isoforms in the rat myocardium Altitude-induced arterial gas embolism - A case report p 165 A92-26336

Disturbances in cerebral hemodynamics in acute p 273 A92-40624 nountain sickness High-altitude adaptation and physical work capacity

p 274 A92-40755 Neurodynamic indicators of high-altitude adaptation p 274 A92-40756 efficiency in humans

Women and altitude decompression sickness p 301 A92-43014

Augmented hypoxic ventilatory response in men at p 387 A92-50072 altitude in the fast jet cockpit p 423 A92-54733 considerations A computerized databank of decompression sickness p 424 A92-54734 incidence in altitude chambers

Mountain sickness p 424 A92-55068 The use of hypoxic and carbon dioxide sensitivity tests

to predict the incidence and severity of acute mountain sickness in soldiers exposed to an elevation of 3800 p 40 N92-13575

(AD-A241792) Human adaptation to the Tibetan Plateau [AD-A244872] p 189 N92-20709

The 1990 Hypobaric Decompression Sickness Workshop: Summary and conclusions

p 231 N92-22352 Effects of high terrestrial altitude on military performance AD-A2466951 p 336 N92-28288

ALTITUDE SIMULATION

Decompression sickness - U.S. Navy altitude chamber experience 1 October 1981 to 30 September 1988

p 35 A92-15961 The feasibility for a pilot to recognize hypoxia while flying at high altitude p 76 A92-18221

Changes of systemic hemodynamics and of blood circulation in skeletal muscles of rats adapted to hypoxia p 217 A92-33772

Correlation between anaerobic threshold test and cardiovascular compensation in hypoxia p 301 A92-43020

Ventilatory and hematopoietic responses to chronic hypoxia in two rat strains p 296 A92-44635

Menstrual history in altitude chamber trainees p 335 A92-45822

Effect of two types of scene detail on detection of altitude change in a flight simulator [AD-A242034] p 128 N92-17758

The use of tympanometry to detect aerotitis media in hypobaric chamber operations

[AD-A248963] p 393 N92-30328

ALTITUDE TOLERANCE

Efficacy of hyperbaric oxygenation in enhancing flight p 6 N92-11618

ALVEOLAR AIR

Pathophysiology of spontaneous venous

embolism [NASA-CR-189915] p 173 N92-19761

Characterization of peak inspiratory flow and alveolar ventilation during maximal arm crank exercise with and without inspiratory airflow resistance

[AD-A247298] p 324 N92-27990

ALVEOLI

Retention modeling of diesel exhaust particles in rats and humans [PB91-2432381 p 173 N92-19954

Development of a lung-cell model for studying workplace genotoxicants

p 174 N92-20020 [PB92-114644]

Characterization of peak inspiratory flow and alveolar ventilation during maximal arm crank exercise with and without inspiratory airflow resistance

[AD-A247298] p 324 N92-27990

AMBIENT TEMPERATURE

Distribution and variation of the skin temperature and heat dissipation over human head and neck at different p 301 A92-43022 ambient temperatures

The changes of surface temperatures of various regions of the body under different ambient temperatures and work p 302 A92-43036 loads

Adaptation and its limitations in extreme environments - The case of a cold environment p 384 A92-53003

Influence of metabolic rate at 40 C ambient temperature on work tolerance times with varying levels of Canadian Forces NBC protective clothing

[AD-A242773] p 90 N92-15548

AMINES

Radioprotection by polysaccharides alone and in combination with aminothiols p 113 A92-20905

Adsorbent testing and mathematical modeling of a solid amine regenerative CO2 and H2O removal system [SAE PAPER 911364] p 136 A92-21779

Possible prebiotic significance of polyamines in the condensation, protection, encapsulation, and biological properties of DNA p 325 A92-44653 Characterization of glucose microsensors small enough

for intracellular measurements

[AD-A252954] p 419 N92-33301

AMINO ACIDS

Growth of peptide chains on silica in absence of amino acid access from without p 153 A92-22104 Chemical transformations of proteinogenic amino acids during their sublimation in the presence of silica

p 153 A92-22105

Synthesis of putrescine under possible primitive earth conditions p 106 A92-22106

Changes in striatal and cortical amino acid and ammonia levels of rat brain after one hyperbaric oxygen-induced p 219 A92-34259

Contribution of temperature gradient to aggregation of thermal heterocopolymers of amino acids in aqueous p 325 A92-44654 Effect of vibration on the metabolism of gamma-aminobutyric acid in the brain for different

functional states of the adrenal cortex

p 327 A92-46601 Organic compounds in the Forest Vale, H4 ordinary p 373 A92-48179 Abjotic synthesis of amino acids and nucleic acid bases simulating an action of cosmic radiation

p 413 A92-53743 Stability of peptides in high-temperature aqueous p 418 A92-56706 solutions Molecular analysis of beta-lactamases from four species of Streptomyces: Comparison of amino acid sequences p 32 N92-12395 with those of other beta-lactamases Isotopic constraints on the origin of meteoritic organic

p 54 N92-13605 Macromolecular recognition: Structural aspects of the origin of the genetic system p 57 Chemistry of aminoacylation of 5'-AMO and the origin

of protein synthesis p.58 N92-13621 Catalytic RNA and synthesis of the peptide bond

p 58 N92-13622 Functional characteristics of the calcium modulated proteins seen from an evolutionary perspective

p 60 N92-13631 Comments on a novel approach to the role of chirality

in the origin of life [DE92-609034] p 110 N92-17970

On the transition period from chemical to biological evolution

[DE92-609049] p 159 N92-18132 Amino acid neurotransmitters; mechanisms of their uptake into synaptic vesicles

[NDRE/PUBL-91/1003] p 190 N92-21186 Use of T7 RNA polymerase to direct expression of outer Surface Protein A (OspA) from the Lyme disease Spirochete, Borrelia burgdorferi p 221 N92-22431

The properties of the uptake system for glycine in synaptic vesicles

p 385 N92-31152 AMMONIA

CH4/NH3/H2O spark tholin - Chemical analysis and interaction with Jovian aqueous clouds

p 90 A92-17989 Changes in striatal and cortical amino acid and ammonia levels of rat brain after one hyperbaric oxygen-induced p 219 A92-34259

AMPHIRIA

Understanding the organization of the amphibian egg cytoplasm - Gravitational force as a probe A92-20851

p 97 Fertilization and development of eggs of the South African clawed toad, Xenopus laevis, on sounding rockets p 97 A92-20852

Role of gravity in the establishment of the dorso-ventral is in the amphibian embryo p 222 N92-23067 ANAEROBES

Microbial diversity: Course report 1991

p 109 N92-17224

ANALOG SIMULATION

Analog environments in space human factors

[AIAA PAPER 92-1527] p 277 A92-38626 performing exobiology experiments on an earth-orbital platform with the Gas-Grain Simulation Facility p 373 A92-48100

FUNCTIONAL	DESIGN	SPECIFIC	CATIONS

Design methodology for a helmet display: Ergonomic p 183 N92-19023 aspects FUNGI

Clinostatic rotation decreases crossover frequencies in the fungus Sordaria macrospora Auersw

p 71 A92-20469 Total Dose Effects (TDE) of heavy ionizing radiation in fungus spores and plant seeds: Preliminary p 299 N92-27124 investigations

Fusible heat sink materials - An identification of alternate candidates --- for astronaut thermoregulation in EVA portable life support systems

(SAE PAPER 911345) p 200 A92-31322

FUZZY SYSTEMS

Models of operator behaviour for controlling and decision-making in man-machine system

p 313 A92-43018

G

G STARS

The chemistry of dense interstellar clouds

p 51 N92-13589 GALACTIC COSMIC RAYS

Fluence-related risk coefficients using the Harderian gland data as an example p 114 A92-20927 Effects of increased shielding on gamma-radiation levels p 129 A92-20932 within spacecraft Basic approaches to spacecraft studies of the biological

effect of heavy ions of galactic cosmic rays p 157 A92-26021 Radiation exposure of air carrier crewmembers 2

PR92-1400371 p 234 N92-23139

GALACTIC EVOLUTION

Theoretical studies of the extraterrestrial chemistry of biogenic elements and compounds p 51 N92-13590 p 53 N92-13596 Intact capture of cosmic dust **GALLIUM COMPOUNDS**

Lack of effect of gallium nitrate on bone density in a rat model of simulated microgravity p 71 A92-20715 **GALVANIC SKIN RESPONSE**

Phasic skin conductance activity and motion sickness p 165 A92-26329 An analysis of scales used for measuring galvanic skin p 274 A92-40754 responses in humans

GAMMA RAYS Mutagenic effects of heavy ions in bacteria

p 101 A92-20892 Effects of increased shielding on gamma-radiation levels p 129 A92-20932 within spacecraft Emesis in ferrets following exposure to different types

of radiation - A dose-response study p 376 A92-50288

Protective effects of Kangwei-1 on multipotential hemopoietic stem cells in gamma-ray irradiated mice p 417 A92-56260

Protective effects of several Chinese herbs against gamma-ray irradiation in mice p 417 A92-56266 History of the determination of radium in man since 1915

p 37 N92-12410 [DE92-000355] The effects of storage on irradiated red blood cells: An

in vitro an in vivo study [AD-A243387] n 122 N92-17190 Facts about food irradiation: Scientific and technical

terms (DE92-6135731 p 213 N92-21554

Facts about food irradiation: Safety of irradiation facilities

[DE92-613601] p 215 N92-21590

GANGLIA

Low power laser irradiation effect with emphasis on injured neural tissues [AD-A246410] p 305 N92-27063

GARMENTS

G protective equipment for human analogs p 245 A92-35470

The design and development of a full-cover partial pressure assembly for protection against high altitude and p 180 N92-18998

GAS ANALYSIS

ECLSS contamination monitoring strategies and technologies

[SAE PAPER 911464] p 136 A92-21790

GAS CHROMATOGRAPHY

An experimental study of the effect of high pressure on the adsorption properties of silochrome C-120 --absorbent for air purification in hyperbaric environments p 177 A92-25269

The development of a volatile organics concentrator for use in monitoring Space Station water quality

(SAE PAPER 911435) p 202 A92-31336

Technical review - Comparison of IC and CE for monitoring ionic water contaminants on SSF

ISAE PAPER 9114381 p 203 A92-31339 A gas chromatographic separator for Columbus trace

gas contamination monitoring assembly p 289 N92-25864

GAS COMPOSITION

Noninvasive determination of respiratory ozone absorption: Development of a fast-responding ozone

[PB91-243220] p 173 N92-19952

Inspired gas composition influences recovery from experimental venous air embolism [AD-A247004] p 307 N92-28135

GAS DETECTORS

Hydrazine monitoring in spacecraft

p 232 N92-22356 Trace gas contamination management in the Columbus MTFF p 288 N92-25862

An innovative technology for detecting and monitoring trace-gas contamination of the Columbus Free Fiver p 288 N92-25863 atmosphere A gas chromatographic separator for Columbus trace

gas contamination monitoring assembly p 289 N92-25864

Trace gas monitoring strategies for manned space p 289 N92-25868 missions

GAS DYNAMICS

Statistically-based decompression tables. 6: Repeat dives on oxyen/nitrogen mixes [AD-A243667] p 122 N92-17124

GAS EVOLUTION

The effects of oxygen on the evolution of microbial p 59 N92-13626 membranes

GAS EXCHANGE

Frequency domain analysis of ventilation and gas exchange kinetics in hypoxic exercise

p 78 A92-18597 Gas exchange and growth of plants under reduced air pressure p 132 A92-20982 Role of external respiration in the formation of the autonomic component of motion sickness

p 162 A92-25260 External respiration and gas exchange during space p 163 A92-26004

External respiration and gas exchange in humans undergoing simulated diving at 350 m

p 164 A92-26009 Optimization studies on a 99 percent purity molecular sieve oxygen concentrator - Effects of the carbon to zeolite molecular sieve ratio p 243 A92-35446 Effects of acid-base status on acute hypoxic pulmonar

vasoconstriction and gas exchange p 254 A92-37785 The external respiration and gas exchange in space p 388 A92-50159 Gas exchange in NASA's biomass production chamber

A preprototype closed human life support system p 440 A92-54280

Pathophysiology of spontaneous venous gas embolism

[NASA-CR-189915] p 173 N92-19761 GAS FLOW

Material flow estimation in CELSS

p 404 A92-50181

GAS GIANT PLANETS

Organic synthesis in the outer Solar System: Recent laboratory simulations for Titan, the Jovian planets, Triton p 55 N92-13608 and comets **GAS GUNS**

Effects of extremely high G acceleration forces on NASA's control and space exposed tomato seeds
[AD-A247488] p 329 N92-28247

GAS INJECTION

U.S. Space Station Freedom waste gas disposal system trade study p 314 A92-44522 **GAS MIXTURES**

Statistically-based decompression tables. 6: Repeat dives on oxyen/nitrogen mixes

p 122 N92-17124 Tracking performance with two breathing oxygen concentrations after high altitude rapid decompression

p 237 N92-22349 Inspired gas composition influences recovery from

experimental venous air embolism p 307 N92-28135

GAS PRESSURE

In vitro measurement of nucleus pulposus swelling pressure: A new technique for studies of spinal adaptation to gravity p 329 N92-29397

(NASA-TM-103853) **GASEOUS ROCKET PROPELLANTS**

Purification and storage of waste gases on Space Station Freedom

[AIAA PAPER 92-3607] p 368 A92-49073

GASES

Breadboarding of the main charcoal filter: A component of the trace gas contamination control assembly for the p 289 N92-25867

Trace gas monitoring strategies for manned space p 289 N92-25868 missions

Trace Gas Contamination Control (TGCC) analysis software for Columbus p 291 N92-25895 **GASTROINTESTINAL SYSTEM**

Biological effects of protracted exposure to ionizing radiation: Review, analysis, and model development [AD-A242981] p 123 N92-17476 Development of a revised mathematical model of the

gastrointestinal tract IDF92-0047481 p 168 N92-18598

GEIGER COUNTERS History of the determination of radium in man since 1915

USSR: Life U.S. Navy/Marine Corps replacement helmet for tactical (AD-A243245) p 146 N92-17143 aircrew p 239 A92-32978 Helmet Mounted Displays and Night Vision Goggles GLOBULINS [JPRS-ULS-92-001] [AGARD-CP-517] p 221 N92-22393 p 181 N92-19008 Structural modification of polysaccharides: Late immunobiological effects of space radiation Fixed wing night attack EO integration and sensor p 73 N92-15530 biochemical-genetic approach p 222 N92-22729 FAD-A2425901 p 181 N92-19009

GONDOLAS SUBJECT INDEX

A CONTRACTOR OF THE CONTRACTOR		•
An evaluation of the protective integrated hood mask for ANVIS night vision goggle compatibility	Microgravity effects of sea urchin fertilization and development p 97 A92-20850	Bacterial proliferation under microgravity conditions p 223 N92-23070
p 181 N92-19012	The characteristics of arm movements executed in	The effect of microgravity on (1) pupil size, (2) vestibular
Comparison of second and third generation night vision	unusual force environments p 111 A92-20858	caloric nystagmus and (3) the swimming behaviour of
goggles in time-limited scenarios	An experimental system for determining the influence	fish p 223 N92-23072
[AD-A244330] p 184 N92-19447 Night vision goggle simulation	of microgravity on B lymphocyte activation and cell	Skeletal responses to spaceflight [NASA-TM-103890] p 234 N92-23424
[AD-A245745] p 292 N92-26158	fusion p 98 A92-20875	Proliferation and performance of hybridoma cells in
Methods of visual scanning with night vision goggles	Alterations in glucose and protein metabolism in animals subjected to simulated microgravity p 101 A92-20898	microgravity (7-IML-1) p 225 N92-23614
[AD-A247470] p 370 N92-28944	Protection from effects of radiation at sublethal doses	Growth, differentiation and development of Arabidopsis
Visual acuity with second and third generation night	during exposures to hypergravitation	thaliana under microgravity conditions (7-IML-1)
vision goggles obtained from a new method of night sky simulation across a wide range of target contrast	p 156 A92-25276	p 225 N92-23616 Transmission of gravistimulus in the statocyte of the
[AD-A248284] p 371 N92-29348	Gravity perception and circumnutation in plants	lentil root (7-IML-1) p 225 N92-23617
Evaluation of Night Vision Goggles (NVG) for maritime	p 218 A92-34195	Gravity related behavior of the acellular slime mold
search and rescue	Gravity effects on single cells - Techniques, findings, and theory p 219 A92-34197	Physarum polycephalum (7-IML-1) p 225 N92-23618
[AD-A247182] p 371 N92-29538 Pilot errors involving Head-Up Displays (HUDs),	Role of gravity in growth processes of plants Russian	Studies on penetration of antibiotic in bacterial cells in space conditions (7-IML-1) p 225 N92-23619
Helmet-Mounted Displays (HMDs), and Night Vision	book	Back pain in astronauts (8-IML-1) p 234 N92-23622
Goggles (NVGs)	[ISBN 5-02-004731-7] p 253 A92-36610	In vitro measurement of nucleus pulposus swelling
[AD-A250719] p 410 N92-32023	Interpreting plant responses to clinostating. I -	pressure: A new technique for studies of spinal adaptation
Perceptual adaptation in the use of night vision	Mechanical stresses and ethylene p 254 A92-38105	to gravity
goggles [NASA-CR-190572] p 438 N92-34234	Development of task network models of human	[NASA-TM-103853] p 329 N92-29397 GRAVITATIONAL FIELDS
GONDOLAS	performance in microgravity [AIAA PAPER 92-1311] p 282 A92-38501	Gravitational fields and aging p 268 A92-39130
Aircrew critique of high-G centrifuge training: Part 3:	Opportunities and questions for the fundamental	Investigation of possible causes for human-performance
What can we change to better serve you?	biological sciences in space	degradation during microgravity flight
[AD-A243496] p 147 N92-17432	[AIAA PAPER 92-1343] p 256 A92-38518	[NASA-CR-190114] p 213 N92-21345
GRADIENTS Improvement of connectionnist learning processes,	A scientific role for Space Station Freedom - Research	Three-dimensional cell to tissue assembly process [NASA-CASE-MSC-21559-1] p 421 N92-34231
working according to the gradients method	at the cellular level [AIAA PAPER 92-1346] p 256 A92-38521	GRAVITATIONAL PHYSIOLOGY
[ETN-92-91335] p 355 N92-28787	Age-dependency of sympathetic nerve response to	Tropistic responses of Avena seedlings in simulated
GRAINS (FOOD)	gravity in humans p 270 A92-39166	hypogravity p 29 A92-14021
Examination of nitrogen fixation by leguminoses and its	The effect of the different gravity on the muscle	Automatic fixation facility for plant seedlings in the
secondary effect on grains using N-15 [OEFZS-4580] p 420 N92-34004	composition in Japanese quail p 261 A92-39169	TEXUS sounding rocket programme p 29 A92-14024 Vector-averaged gravity alters myocyte and neuron
GRAMMARS	Simulation of the effect of microgravity on the human body by its prolonged rotation about the horizontal located	properties in cell culture p 30 A92-15957
Automated protocol analysis: Tools and methodology	long axis prolonged rotation about the nonzontar located	Evaluation of spontaneous baroreflex response after 28
[AD-A242040] p 175 N92-18245	Perspectives for the application of the Penaz's method	days head down tilt bedrest
GRANTS	for a non-invasive continuous blood pressure	[IAF PAPER 91-550] p 77 A92-18547
Super auditory localization for improved human-machine	measurement in space medicine p 273 A92-39214	The influence of increased gravitoinertial forces on the
interfaces [AD-A250288] p 370 N92-29121	The membrane-electrolyte system - Model of the interaction of gravity with biological systems at the cellular	vestibulo-oculomotor response [IAF PAPER 91-555] p 77 A92-18552
GRAPHIC ARTS	level p 328 A92-48624	Effects of unilateral selective hypergravity stimulation
Induced pictorial representations	Possible mechanisms of indirect gravity sensing by	on gait
[AD-A248560] p 400 N92-30336	cells p 382 A92-52387	(IAF PAPER 91-556) p 78 A92-18553
GRAPHS (CHARTS)	Gravity dependent processes and intracellular motion	Prevention of bone loss and muscle atrophy during
Structure and strategy in encoding simplified graphs p 236 A92-33902	p 382 A92-52388 Cell biophysics and plant gravitropism	manned space flight [IAF PAPER 91-557] p 78 A92-18554
Judgments of change and proportion in graphical	p 383 A92-52390	Human locomotion and workload for simulated lunar and
perception p 364 A92-46299	Changes observed in lymphocyte behavior during	Martian environments
GRASSLANDS	gravitational unloading p 392 A92-52395	[IAF PAPER 91-561] p 86 A92-18556
Rangeland-plant response to elevated CO2 [DE90-013702] p 30 N92-12387	Detection of gravity through nonequilibrium	The Biological Flight Research Facility
[DE90-013702] p 30 N92-12387 GRAVIRECEPTORS	mechanisms p 383 A92-52396 Enzymatic catalysis in organic media - Fundamentals	[IAF PAPER 91-578] p 70 A92-18567 Lack of effect of gallium nitrate on bone density in a
Gravity detection through bifurcation	and selected applications p 384 A92-52397	rat model of simulated microgravity p 71 A92-20715
p 93 A92-20828	Results from plant growth experiments aboard orbital	Life sciences and space research XXIV(1) - Gravitational
The function of calcium in plant graviperception	stations p 33 N92-13083	biology; Proceedings of Symposia 10 and 13 of the Topical
p 95 A92-20837 Perception of gravity by plants p 97 A92-20853	Spatial disorientation research on the Dynamic	Meeting of the Interdisciplinary Scientific Commission F (Meetings F1 and F2) of the COSPAR 28th Plenary
Development of higher plants under altered gravitational	Environmental Simulator (DES) [AD-A241203] p 45 N92-13578	Meeting, The Hague, Netherlands, June 25-July 6, 1990
conditions p 218 A92-34196	Biological patterns: Novel indicators for pharmacological	p 93 A92-20827
Gravity effects on single cells - Techniques, findings,	assays p 82 N92-15868	Gravity detection through bifurcation
and theory p 219 A92-34197	The role of calcium and calmodulin in the response of	p 93 A92-20828 Possible actions of gravity on the cellular machinery
Hydrostatic factors affect the gravity responses of algae and roots p 259 A92-39146	roots to gravity [NASA-CR-189800] p 108 N92-16545	p 93 A92-20829
An overlooked gravity sensing mechanism	Fuel utilization during exercise after 7 days of bed rest	Biological role of gravity - Hypotheses and results of
p 259 A92-39147	[NASA-TP-3175] p 121 N92-16554	experiments on 'Cosmos' biosatellites
From Gravity and the Organism to Gravity and the	Pulmonary effects of high-G and positive pressure	p 93 A92-20830
Cell p 382 A92-52385 Gravity sensing mechanisms in plant cells	breathing p 169 N92-18978 Effects on Gz endurance/tolerance of reduced pressure	Theory and experimental results on gravitational effects on monocellular algae p 93 A92-20831
p 383 A92-52389	schedules using the Advanced Technology Anti-G Suite	Physical effects at the cellular level under altered gravity
Cell biophysics and plant gravitropism	(ATAGS) p 171 N92-18987	conditions p 94 A92-20832
p 383 A92-52390	The Military Aircrew Head Support System (MAHSS)	Gravity effects on biological systems
Detection of gravity through nonequilibrium mechanisms p 383 A92-52396	p 179 N92-18988	p 94 A92-20833
mechanisms p 383 A92-52396 Gravity related behavior of the acellular slime mold	Assessment of physiological requirements for protection of the human cardiovascular system against high sustained	Synaptic plasticity and gravity - Ultrastructural,
Physarum polycephalum (7-IML-1) p 225 N92-23618	gravitational stresses p 171 N92-18990	biochemical and physico-chemical fundamentals p 94 A92-20835
GRAVITATION	Finite element modeling of sustained +Gz acceleration	Chromosomes and plant cell division in space -
Biological patterns: Novel indicators for pharmacological	induced stresses in the human ventricle myocardium	Environmental conditions and experimental details
assays p 82 N92-15868 GRAVITATIONAL EFFECTS	p 172 N92-18992	p 94 A92-20836
Lung and chest wall mechanics in microgravity	Space Station Centrifuge: A Requirement for Life Science Research	The function of calcium in plant graviperception
p 4 A92-13197	[NASA-TM-102873] p 215 N92-20353	p 95 A92-20837
Evolution of bioconvective patterns in variable gravity	The applicability of nonlinear systems dynamics chaos	Ultrastructural analysis of organization of roots obtained
p 1 A92-13242	measures to cardiovascular physiology variables	from cell cultures at clinostating and under microgravity p 95 A92-20838
Effects of unilateral selective hypergravity stimulation on gait	p 190 N92-21274	The role of cellulases in the mechanism of changes of
[IAF PAPER 91-556] p 78 A92-18553	Investigation of possible causes for human-performance degradation during microgravity flight	cell walls of Funaria hygrometrica moss protonema at
Relative contribution of gravity to pulmonary perfusion	[NASA-CR-190114] p 213 N92-21345	clinostating p 95 A92-20839
heterogeneity p 70 A92-18599	Effect of microgravity on several visual functions during	Peculiarities of the submicroscopic organization of
Measurement of circumnutation in maize roots	STS shuttle missions p 236 N92-22331	Chlorella cells cultivated on a solid medium in
p 71 A92-20468	Microgravity effects on standardized cognitive	microgravity p 95 A92-20840
Identification of specific gravity sensitive signal transduction pathways in human A431 carcinoma cells	performance measures p 237 N92-22335 Role of gravity in the establishment of the dorso-ventral	Swimming behavior of Paramecium - First results with the low-speed centrifuge microscope (NIZEMI)
p 96 A92-20847	axis in the amphibian embryo p 222 N92-23067	p 95 A92-20842

Lower body negative pressure as a countermeasure

SUBJECT INDEX Developmental biology on unmanned space craft p 96 A92-20843 The effect of microgravity on the development of plant p 96 A92-20844 protoplasts flown on Biokosmos 9 Structural and functional organisation of regenerated plant protoplasts exposed to microgravity on Biokosmos p 96 A92-20845 Possible mechanism of microgravity impact on Carausius morosus ontogenesis p 96 A92-20848 Microgravity effects on Drosophila melanogaster development and aging - Comparative analysis of the results of the fly experiment in the Biokosmos 9 biosatellite p 97 A92-20849 Microgravity effects of sea urchin fertilization and development p 97 A92-20850 Understanding the organization of the amphibian egg cytoplasm - Gravitational force as a probe p 97 A92-20851 Perception of gravity by plants p 97 A92-20853 Microcomputer-based monitoring of cardiovascular functions in simulated microgravity p 111 A92-20857 Evolution of a phase separated gravity independent p 134 A92-20995 bioreactor Upper body exercise - Physiology and training application for human presence in space [SAE PAPER 911461] p 116 A92-21787 Locomotor exercise in weightlessness p 116 A92-21847 [SAE PAPER 911457] Microbial growth and physiology in space - A review [SAE PAPER 911512] p 106 A92-21851 p 106 A92-21851 Tolerance to chest-to-back (+Gx) and head-to-feet (+Gz) overloads during drug-induced hypohydration A92-25253 p 161 Responses of the regional vessel tonus to the effects of orthostatic and gravitational loads p 161 A92-25254 The effect of weightlessness on the progress of muscle repair in rats flown on the Cosmos-2044 biosatellite p 155 A92-25261 The effect of weightlessness on healing of bone fractures in rats flown on the Cosmos-2044 biosatellite p 155 A92-25262 G-endurance during heat stress and balanced pressure breathing p 165 A92-26331 Intermittent acceleration as a countermeasure to soleus p 158 A92-26548 muscle atrophy Effects of a simulated microgravity model on cell structure and function in rat testis and epididymis p 158 A92-26549 Human physiology in microgravity - An overview A92-32455 p 188 Skeletal responses to spaceflight p 218 A92-34192 Gravity effects on reproduction, development, and p 218 A92-34193 aging Neurovestibular physiology in fish p 218 A92-34194 Development of higher plants under altered gravitational p 218 A92-34196 Operational and human factor problems in the design of a crewmember negative G restraint p 243 A92-35447 Numerical study of arterial flow during sustained external p 229 A92-35846 acceleration Hypergravity signal transduction in HeLa cells with phosphorylation of proteins immunoprecipitated with anti-microtubule-associated protein antibodies p 255 A92-38116 Space research with intact organisms [AIAA PAPER 92-1344] p 256 A92-38519 Space research on organs and tissues p 268 A92-38520 [AIAA PAPER 92-1345] Research in molecular biology - Realizing the potential of microgravity in biological systems [AIAA PAPER 92-1347] p 257 A92-38522 Analog environments in space human factors [AIAA PAPER 92-1527] p 277 A p 277 A92-38626 Crew training for psycho-socio adaptation to long duration missions [AIAA PAPER 92-1627] p 278 A92-38700 Union of Physiological International Sciences Commission on Gravitational Physiology, Annual Meeting, 12th, Leningrad, USSR, Oct. 14-18, 1990, Proceedings A92-39126 p 257 p 257 Microgravity and the lung A92-39127 Current status of acute high-G physiology p 268 A92-39128 p 257 Animal motility and gravity A92-39129 A92-39130 Gravitational fields and aging p 268 Hyponoradrenergic syndrome of weightlessness - Its

Effects of microwave radiation on neuronal activity

[AD-A242515]

NEUROPSYCHIATRY SUBJECT INDEX

Regulation of brain muscarinic receptors by protein	Neutral buoyancy and virtual environment experiments	Visual acuity with second and third generation night
kinase C	in teleoperated and autonomous control of space robots	vision goggles obtained from a new method of night sky
[AD-A244419] p 172 N92-19087	[AIAA PAPER 92-1316] p 282 A92-38503	simulation across a wide range of target contrast
Receptor subtype alterations: Bases of neuronal	Telerobotic interactions in an EVA worksite	[AD-A248284] p 371 N92-29348
plasticity and learning	(AIAA PAPER 92-1575) p 284 A92-38668	Evaluation of Night Vision Goggles (NVG) for maritime
[AD-A244406] p 176 N92-19799	A method of evaluating efficiency during space-suited	search and rescue
Biological rhythms: Implications for the worker. New	work in a neutral buoyancy environment	[AD-A247182] p 371 N92-29538
developments in neuroscience [PB92-117589] p 190 N92-21009	[NASA-TP-3153] p 184 N92-19772	Pilot errors involving Head-Up Displays (HUDs), Helmet-Mounted Displays (HMDs), and Night Vision
Electroencephalographic monitoring of complex mental	Microgravity simulation p 320 N92-26994	Goggles (NVGs)
tasks	NEUTRON ACTIVATION ANALYSIS	[AD-A250719] p 410 N92-32023
[NASA-CR-4425] p 213 N92-21549	A method for determining levels of calcium in the hand	Perceptual adaptation in the use of night vision
Fourth conference on the neurobiology of learning and	using activated neutrons from (Pu-238)-Be sources p 177 A92-25273	goggles
memory	NEUTRON DIFFRACTION	[NASA-CR-190572] p 438 N92-34234
[AD-A247174] p 310 N92-27538	Neutron scatter studies of chromatin structures related	NITINOL ALLOYS
Stress-induced enhancement of the startle reflex [AD-A247096] p 310 N92-27839	to functions	Device for removing foreign objects from anatomic
[AD-A247096] p 310 N92-27839 The effects of hydrazines on neuronal excitability	[DE92-014032] p 419 N92-33181	organs [NASA-CASE-GSC-13306-1] p 431 N92-33032
[AD-A247103] p 306 N92-27844	NEUTRON IRRADIATION	NITRATES
Neural basis of motion perception	Emesis in ferrets following exposure to different types	Lack of effect of gallium nitrate on bone density in a
[AD-A248411] p 311 N92-28050	of radiation - A dose-response study	rat model of simulated microgravity p 71 A92-20715
The 24th Carnegie symposium on cognition: The neural	p 376 A92-50288	NITROBACTER
basis of high-level vision	Beneficial uses of radiation	MELISSA: Physical links of compartments
[AD-A248460] p 311 N92-28142	[DE92-003024] p 168 N92-18799	Nitrobacter/Spirulina p 319 N92-26981 NITROGEN
The Coordinated Noninvasive Studies (CNS) project, phase 1	NEUTRONS	Paleobiomarkers and defining exobiology experiments
[AD-A247159] p 337 N92-28397	Low dose neutron late effects: Cataractogenesis [DE92-005539] p 235 N92-24033	for future Mars experiments p 54 N92-13601
Neuropsychological components of object	Neutron scatter studies of chromatin structures related	Statistically-based decompression tables. 6: Repeat
identification	to functions	dives on oxyen/nitrogen mixes
[AD-A247049] p 355 N92-28877	[DE92-014032] p 419 N92-33181	[AD-A243667] p 122 N92-17124
A systems theoretic investigation of neuronal network	NIGHT	NITROGEN ISOTOPES
properties of the hippocampal formation	Night-sleep pattern and the susceptibility to motion	Isotopic constraints on the origin of meteoritic organic
[AD-A250246] p 357 N92-29334	sickness p 163 A92-25274	matter p 54 N92-13605 NITROGEN 15
Neurophysiological analysis of circadian rhythm entrainment	Analysis of the stages of the night sleep of human	Examination of nitrogen fixation by leguminoses and its
[AD-A248466] p 393 N92-30319	subjects from the standpoint of the functional quantization	secondary effect on grains using N-15
Analysis and synthesis of adaptive neural elements and	of the vital activity p 166 A92-27504	[OEFZS-4580] p 420 N92-34004
assembles	The effect of field-of-view size on performance of a	NITROGENATION
[AD-A248467] p 400 N92-30320	simulated air-to-ground night attack p 182 N92-19018	Examination of nitrogen fixation by leguminoses and its
The effects of hydrazines of neuronal excitability	Fixed wing night carrier aeromedical considerations p 215 N92-21972	secondary effect on grains using N-15
[AD-A247142] p 395 N92-31491		[OEFZS-4580] p 420 N92-34004 NODULES
Modeling of learning-induced receptive field plasticity in auditory neocortex	Photic effects on sustained performance p 230 N92-22333	The otolith apparatus and cerebellar nodulus in rats
[AD-A250348] p 396 N92-31558	NIGHT FLIGHTS (AIRCRAFT)	developed under 2-G gravity p 265 A92-39203
A biological model of the effects of toxic substances	Personality, task characteristics and helicopter pilot	NOISE (SOUND)
[AD-A247138] p 386 N92-31980	stress p 12 A92-13016	Investigation of parameters for ergonomical designing
PET studies of components of high-level vision	The impact of personality and task characteristics on	of environmental controlling system in aircraft cabin
[AD-A250873] p 430 N92-32344		p 313 A92-43019
	stress and strain during helicopter flight	· ·
NEUROPSYCHIATRY	p 235 A92-33804	Evaluation of somatic eigenstate under combined
NEUROPSYCHIATRY HIV positivity and aviation safety p 266 A92-37175	p 235 A92-33804 Eyeglass use by U.S. Navy jet pilots - Effects on night	Evaluation of somatic eigenstate under combined hypoxia, heat, noise and vibration p 302 A92-43030
NEUROPSYCHIATRY HIV positivity and aviation safety p 266 A92-37175 Neurological, Psychiatric and Psychological Aspects of	p 235 A92-33804 Eyeglass use by U.S. Navy jet pilots - Effects on night carrier landing performance p 227 A92-34256	Evaluation of somatic eigenstate under combined
NEUROPSYCHIATRY HIV positivity and aviation safety p 266 A92-37175 Neurological, Psychiatric and Psychological Aspects of Aerospace Medicine	p 235 A92-33804 Eyeglass use by U.S. Navy jet pilots - Effects on night carrier landing performance p 227 A92-34256 Design of helicopter night pilotage sensors: Lessons	Evaluation of somatic eigenstate under combined hypoxia, heat, noise and vibration p 302 A92-43030 Real-ear attenuation testing system (RATS)
NEUROPSYCHIATRY HIV positivity and aviation safety p 266 A92-37175 Neurological, Psychiatric and Psychological Aspects of Aerospace Medicine [AGARD-AG-324] p 33 N92-13547	p 235 A92-33804 Eyeglass use by U.S. Navy jet pilots - Effects on night carrier landing performance p 227 A92-34256 Design of helicopter night pilotage sensors: Lessons learned from recent flight experiments and field	Evaluation of somatic eigenstate under combined hypoxia, heat, noise and vibration p 302 A92-43030 Real-ear attenuation testing system (RATS) [AD-A241475] p 379 N92-13573 Modeling the ear's response to intense impulses and the development of improved damage risk criteria
NEUROPSYCHIATRY HIV positivity and aviation safety	Eyeglass use by U.S. Navy jet pilots - Effects on night carrier landing performance p 227 A92-34256 Design of helicopter night pilotage sensors: Lessons learned from recent flight experiments and field assessments p 183 N92-19020	Evaluation of somatic eigenstate under combined hypoxia, heat, noise and vibration p 302 A92-43030 Real-ear attenuation testing system (RATS) [AD-A241475] Modeling the ear's response to intense impulses and the development of improved damage risk criteria [AD-A252365] p 431 N92-32916
NEUROPSYCHIATRY HIV positivity and aviation safety p 266 A92-37175 Neurological, Psychiatric and Psychological Aspects of Aerospace Medicine [AGARD-AG-324] p 33 N92-13547	p 235 A92-33804 Eyeglass use by U.S. Navy jet pilots - Effects on night carrier landing performance p 227 A92-34256 Design of helicopter night pilotage sensors: Lessons learned from recent flight experiments and field assessments p 183 N92-19020 NIGHT VISION	Evaluation of somatic eigenstate under combined hypoxia, heat, noise and vibration p 302 A92-43030 Real-ear attenuation testing system (RATS) [AD-A241475] p 39 N92-13573 Modeling the ear's response to intense impulses and the development of improved damage risk criteria [AD-A252365] p 431 N92-32916 NOISE INJURIES
NEUROPSYCHIATRY HIV positivity and aviation safety Neurological, Psychiatric and Psychological Aspects of Aerospace Medicine [AGARD-AG-324] NEUROTIC DEPRESSION Depression syndrome caused by exposure to adverse environmental factors NEUROTRANSMITTERS	Eyeglass use by U.S. Navy jet pilots - Effects on night carrier landing performance p 227 A92-34256 Design of helicopter night pilotage sensors: Lessons learned from recent flight experiments and field assessments p 183 N92-19020	Evaluation of somatic eigenstate under combined hypoxia, heat, noise and vibration p 302 A92-43030 Real-ear attenuation testing system (RATS) [AD-A241475] p 39 N92-13573 Modeling the ear's response to intense impulses and the development of improved damage risk criteria [AD-A252365] p 431 N92-32916 NOISE INJURIES Heart rate variability and auditory workload during noise
